**HARNESS
THE POWER OF
THE INTERNET**

Your Best Value Alternative: InstaPage

The result of over a decade of development, InstaPage stands out as one of the fullest featured, easiest to manage, and least expensive HOA website products available on the market. It is sold both directly to HOA's through our website at instapage.net, as well as through reseller management companies participating in our InstaPage Management Partners program. Through this program, participating companies can easily and affordably offer cutting edge websites to their HOA clients, either as a low cost value added service, or as a marked up profit center. Website creation, management of its content, and even deletion of the websites are all at the direct control of the management company's staff. Customer support is provided by our US based email support team.

We also offer an upscale version of the product called InstaPage Gold. This is a more sophisticated, standalone version that is packaged with high quality custom design, home page animation, hosting & support. High end and large-scale communities nationwide use InstaPage Gold to power their community websites.

Both products offer optional integration with social media, the Paylease online payment processing system, and the VMS (Village Management Software) product used by management companies and large-scales to run their accounting and operations. Also provided for InstaPage users is a mobile version of the product that delivers a smooth user interface and experience on smart phones.
